

Imam Reza Schools have secured 156 awards at different levels (district, provincial, and national) in the Khwarizmi Youth Festival. In the academic sector, three faculty members of IRIU were listed among the top %2 of the world's scientists in 2022 and 2024. In the organizational sector, the Razavi Museum was named the best museum in the country among public museums by the International Council of Museums (ICOM) in the «Research» category.

◆ Creativity in Art; Innovation in Pilgrimage Souvenirs

The Razavi Art School has been pursued for four years in collaboration with various academic institutions, including universities across the country. The International Congress of Razavi Art School was held, and papers were written about it, now recognized as a national document by the Supreme Council of Cultural Revolution. The Razavi Art School focuses on the social extension of pilgrimage, empowering artists to create contemporary art, and refining cultural consumption. This initiative has been diligently pursued in academic spaces, with significant involvement from prominent national and international artists. Recent studies on the interaction of artificial intelligence (AI) with art at the shrine, the use of AI in the shrine, and its role in promoting Imam Reza's culture and art are ongoing. The design and production of artistic products under the brand of «Mehr» is among the institution's recent initiatives. The «Mehr» brand aims to produce pilgrimage souvenirs that serve as a social extension of pilgrimage, connecting viewers with Imam Reza shrine, Imam Reza, and the concept of pilgrimage. Currently, over 1,100 artistic products have been produced under the brand, providing employment for many, including children with disabilities, single mothers, and prisoners.

◆ A Symbol of Research for Health

Razavi Super-Specialty Hospital, one of the largest and most equipped hospitals in the region, began its medical, scientific, and research activities in 2005. Hosting national and international congresses as well as specialized workshops in various medical fields has allowed numerous researchers and scientists from within and outside the country to familiarize themselves with the latest treatment and care approaches for various diseases. One of the hospital's most distinguished units is the Nuclear Medicine Department, which has made strides in producing various radiopharmaceuticals, including Ga-68RM2, Ga-68Pentixafor, and FAPI-Ga68.

◆ Research, Innovation, and Technology for the People's Table

The Razavi Seed and Sapling Knowledge-based Institute is one of the pioneers in knowledge-based agriculture in Iran, achieving significant advancements in seed production and quality enhancement through specialized knowledge, targeted research, and modern technologies. The Razavi Dairy and Livestock Industries Company, as one of AQR's major entities, plays a crucial role in the country's economic development and food security through its extensive experience in producing and supplying agricultural and dairy products. The company has established the first industrial «Micronized Flake» livestock feed line in Iran. Razavi Food Industries (Razavi Bread) is one of the oldest and largest food product manufacturers in Iran, consistently contributing to the development of the national food industry through research, innovation, and product quality enhancement. The Razavi Agricultural Company is one of Iran's largest agricultural firms, engaged in extensive agricultural production and research and development
